Experience

Simbo.ai | Bengaluru, Karnataka

FULL STACK DEVELOPER | 09/2022 - Present

- Implemented frontend functionalities, user interface design, and interactive features for the Simbolalphus web app, improving the overall user experience.
- Streamlined the Simbolalphus and Simbo web apps through the development and seamless integration of custom plugins, optimized performance, resulting in a 30% reduction in load time and improved user satisfaction.
- Integrated robust gateway APIs to ensure smooth data flow between multiple systems and platforms.
- Refined Scribe UI and backend, leveraging coding expertise to enhance data management and documentation processes in the medical field. Using LLMS for transcript correction and summarization tasks.
- Crafted a file upload application that integrates with EHR vendors' APIs, facilitating seamless uploading of patient CSV files and improving data management and interoperability between systems.
- Worked with a tech stack comprising NodeJS, React, Angular, PHP, MySQL to develop various web applications and enhance their functionalities.

Simbo.ai | Bengaluru, Karnataka

FULL STACK DEVELOPER-INTERN | 06/2022 - 08/2022

- Spearheaded the end-to-end implementation of an internal admin software, seamlessly integrating frontend and backend components, and incorporating API integration with EHR systems for streamlined data handling.
- Created a specialized markdown parser tailored for EHR-specific information templates, enabling seamless parsing and utilization of structured data.
- Conducted code reviews, debugging, and issue resolution to ensure application stability and functionality. Utilized a tech stack including PHP, React, Bootstrap, and MySQL.

Skills

JavaScript, PHP, Node.js, ReactJS, AngularJS, ExpressJS, MySQL, MongoDB, Linux, Git, GitHub, Bootstrap, HTML5, HTML, CSS, NextJS, Linux, Redux, REST, Tailwind, API development, Fullstack

Projects

- **Spotify playlists to you-tube** (<https://github.com/MaansiBisht/spotify-youtube-webapi-integration>) - built a web app using Spotify web API node and google APIs in Node.js enabling users to effortlessly convert their Spotify playlist to youtube.
- **Production ready react app** (<https://image-stocks-5272f.web.app/>) - created a high-performance SPA using React, Firebase Cloud and Authentication, and the Context API ensuring seamless user experience, secure authentication.
- **Youtube clone** - (<https://github.com/MaansiBisht/youtube-clone>) - built YouTube clone with React.js, Redux Toolkit, Tailwind CSS, featuring search and video playback
- **MERN Mart** (<https://github.com/MaansiBisht/MERNMart>) - constructed a fully functional eCommerce website using the MERN stack.

Education

Vivekananda Institute Of Professional Studies | New Delhi
MASTER OF COMPUTER APPLICATION | 08/2021

Vivekananda Institute Of Professional Studies
BACHELOR'S in COMPUTER APPLICATION | 05/2019
